

# Staff Report 40

## **APPLICANT:**

---

Oliver E. Clark III and Jean A. Clark, trustees of the Oliver E. Clark III and Jean A. Clark Family Trust dated October 12, 1983

## **PROPOSED ACTION:**

---

Issuance of a General Lease – Recreational and Protective Structure Use

## **AREA, LAND TYPE, AND LOCATION:**

Sovereign land in the Main Channel of Huntington Harbour, adjacent to 16601 Carousel Lane, Huntington Beach, Orange County.

## **AUTHORIZED USE:**

Use and maintenance of an existing boat dock, access ramp, cantilevered deck, glass railing, brick pillars, rock slope protection and sheet pile.

## **TERM:**

10 years, beginning March 29, 2022.

## **CONSIDERATION:**

**Boat Dock, Access Ramp, Cantilevered Deck, Glass Railing, and Brick Pillars:** \$2,435 per year, with an annual Consumer Price Index adjustment.

**Rock Slope Protection and Sheet Pile:** The public health and safety, with the State reserving the right at any time to set a monetary rent if the Commission finds such action to be in the State's best interest.

## **SPECIFIC LEASE PROVISIONS:**

Liability insurance in an amount no less than \$1,000,000 per occurrence.

## **STAFF ANALYSIS AND RECOMMENDATION:**

---

### **AUTHORITY:**

Public Resources Code sections 6005, 6216, 6301, 6321, 6321.2, 6501.1, 6503, 6503.5, and 6505.5; California Code of Regulations, title 2, sections 2000 and 2003.

### **PUBLIC TRUST AND STATE'S BEST INTERESTS:**

On March 29, 2012, the Commission authorized a 10-year General Lease – Recreational and Protective Structure Use to Oliver E. Clark III and Jean A. Clark, Trustees of the Oliver E. Clark III and Jean A. Clark Family Trust dated October 12, 1983, for an existing boat dock, rock slope protection, and placement of a sheet pile; the retention of an existing cantilevered deck with glass railing and access ramp; the removal of an existing sunroom and catwalk; and the construction, use, and maintenance of a glass railing and brick pillars ([Item C94, March 29, 2012](#)). That lease will expire on March 28, 2022. The Applicant is now applying for a General Lease – Recreational and Protective Structure Use for use and maintenance of the existing boat dock, access ramp, cantilevered deck, glass railing, brick pillars, rock slope protection and sheet pile in Huntington Harbour.

The subject facilities are privately owned and maintained and have existed at this location for many years. The boat dock and access ramp are used for the docking and mooring of recreational boats. Recreational boating is water-dependent and is generally consistent with the common law Public Trust Doctrine. The California Legislature has identified private recreational boating facilities as an authorized use of Public Trust lands (Pub. Resources Code, § 6503.5). The rock slope protection and sheet pile serve to protect the existing bulkhead by preventing erosion and maintaining the channel's integrity. The bulkhead underneath the deck serves to stabilize the bank, and loss or degradation of this structure could result in property damage and public safety concerns within the lease area and the surrounding waterways.

The Main Channel in Huntington Harbour was created in the early 1960s, and the adjacent upland parcel is privately owned and developed with a residence. There is no public access at this upland property because the private upland property directly abuts the concrete bulkhead that defines the limits of the channel. The boat dock extends to the pierhead line which is 60 feet into the 400-foot-wide channel, leaving the majority of the Main Channel available for navigation and public recreation.

The existing cantilevered deck is connected to the upland residence. Residential use is generally not consistent with the Public Trust Doctrine. However, the

cantilevered deck extends no more than 5 feet over the Main Channel and does not substantially interfere with the public’s right of navigation or access. Proposed rent for the cantilevered deck is calculated using a benchmark rate based on nearby upland land values to ensure the State receives appropriate compensation for use of sovereign land as the deck serves as an extension of the upland property’s private backyard.

The proposed lease does not alienate the State’s fee simple interest or permanently impair public rights. The lease is limited to a 10-year term, does not grant the lessee exclusive rights to the leased premises, and reserves an easement to the public for Public Trust-consistent uses. Upon termination of the lease, the lessee may be required to remove all improvements from State land. The proposed lease requires the lessee to insure the lease premises and indemnify the State for any liability incurred as a result of the lessee’s activities thereon. The lease also requires the payment of annual rent to compensate the people of the State for the use of public land.

**CLIMATE CHANGE:**

Climate change impacts, including sea level rise, increased wave activity, storm events, and flooding are not limited to the open coast. The existing structures subject to the proposed lease are located within the Huntington Harbour development, along an inland, navigable, tidally influenced channel, and may be vulnerable to the impacts of sea level rise. Huntington Harbour is built near sea level elevation, and as a result is vulnerable to flooding and storm surge events. Huntington Harbour is adjacent to two wetlands, Bolsa Chica and the Seal Beach National Wildlife Refuge, which could act as natural buffers to storm surges and lessen flood risks.

The California Ocean Protection Council updated the State of California Sea-Level Rise Guidance in 2018 to provide a synthesis of the best available science on sea level rise projections and rates. Commission staff evaluated the “high emissions,” “medium-high risk aversion” scenario to apply a conservative approach based on both current emission trajectories and the lease location and structures. The Los Angeles tide gauge was used for the projected sea level rise scenario for the lease area as listed in Table 1.

**Table 1. Projected Sea Level Rise for Los Angeles**

Year	Projection (feet)
2030	0.7
2040	1.2
2050	1.8

2100	6.7
------	-----

Source: Table 28, State of California Sea-Level Rise Guidance: 2018 Update

Note: Projections are with respect to a 1991 to 2009 baseline.

As stated in Safeguarding California Plan: 2018 Update (California Natural Resources Agency 2018), climate change is projected to increase the frequency and severity of natural disasters related to flooding, drought, and storms (especially when coupled with sea level rise). The combination of these conditions will likely result in increased wave run up, storm surge, and flooding in coastal and near coastal areas. In tidally influenced waterways, more frequent and powerful storms can result in increased flooding conditions and damage from storm created debris. Climate change and sea level rise will further influence coastal and riverine areas by changing erosion and sedimentation rates. Beaches, coastal landscapes, and near-coastal riverine areas will be exposed to increased wave force and run up, potentially resulting in greater beach or bank erosion than previously experienced.

This increase in sea level combined with more frequent and stronger storm events will likely expose the lease area structures to higher flood risks, comprised of greater total water levels for longer periods of time. Flooding conditions could cause structures to be damaged or dislodged, presenting hazards to public safety as well as dangers for navigation within the channel. The fixed features may need to be raised or reinforced to withstand future conditions. Although the bulkhead underneath the cantilevered deck is not under the Commission’s jurisdiction, any sea level rise impacts to the bulkhead could also affect the structures under the Commission’s jurisdiction because it serves to stabilize the bank. Therefore, any loss or degradation of the bulkhead would result in property damage and public safety concerns within the lease area and the surrounding waterways.

More locally based knowledge of sea level rise impacts and adaptation strategies will be available to Huntington Harbour residents as a result of the ongoing efforts to update the City of Huntington Beach’s Local Coastal Program and General Plan, and through the city’s Coastal Resiliency Task Force.

Regular maintenance, as referenced in the lease, may reduce the likelihood of severe structural degradation or dislodgement. Pursuant to the proposed lease, the Applicant acknowledges that the lease premises and adjacent upland (not within the lease area) are located in an area that may be subject to the effects of climate change, including sea level rise.

**CONCLUSION:**

For all the reasons above, staff believes the issuance of this lease will not substantially interfere with Public Trust needs at this location, at this time, and for the foreseeable term of the proposed lease; and is in the best interests of the State.

**OTHER PERTINENT INFORMATION:**

---

1. Approval or denial of an application is a discretionary action by the Commission. Each time the Commission approves or rejects a use of sovereign land, it exercises legislatively delegated authority and responsibility as trustee of the State's Public Trust lands as authorized by law. If the Commission denies the application, the Applicant may be required to remove the existing boat dock, access ramp, cantilevered deck, glass railing, brick pillars, rock slope protection and sheet pile, and restore the premises to their original condition, upon expiration of the current lease. Upon expiration or prior termination of the lease, the lessee also has no right to a new lease or renewal of any previous lease.
2. This action is consistent with the "Leading Climate Activism" and "Meeting Evolving Public Trust Needs" Strategic Focus Areas of the Commission's 2021-2025 Strategic Plan.
3. Staff recommends that the Commission find that this activity is exempt from the requirements of the California Environmental Quality Act (CEQA) as a categorically exempt project. The project is exempt under Class 1, Existing Facilities; California Code of Regulations, title 2, section 2905, subdivision (a)(2).

Authority: Public Resources Code section 21084 and California Code of Regulations, title 14, section 15300, and California Code of Regulations, title 2, section 2905.

**EXHIBITS:**

---

- A. Land Description
- B. Site and Location Map

## **RECOMMENDED ACTION:**

---

It is recommended that the Commission:

### **CEQA FINDING:**

Find that the activity is exempt from the requirements of CEQA pursuant to California Code of Regulations, title 14, section 15061 as a categorically exempt project, Class 1, Existing Facilities; California Code of Regulations, title 2, section 2905, subdivision (a)(2).

### **PUBLIC TRUST AND STATE'S BEST INTERESTS:**

1. Find that the existing and, for a limited period, continuing use and maintenance of the existing boat dock, access ramp, glass railing on the cantilevered deck, brick pillars, rock slope protection and sheet pile will not substantially interfere with Public Trust needs and values at this location and are consistent with the common law Public Trust Doctrine; and
2. Find that the existing and, for a limited period, continuing use and maintenance of the existing cantilevered deck is not generally consistent with the Public Trust Doctrine, but the current use does not substantially interfere with the trust; and
3. Find that issuing the proposed lease is in the best interests of the State.

### **AUTHORIZATION:**

Authorize issuance of a General Lease – Recreational and Protective Structure Use to the Applicant beginning March 29, 2022, for a term of 10 years, for the use and maintenance of an existing boat dock, access ramp, cantilevered deck, glass railing, brick pillars, rock slope protection and sheet pile, as described in Exhibit A and shown on Exhibit B (for reference purposes only) attached and by this reference made a part hereof; consideration for the boat dock, access ramp, cantilevered deck, glass railing, and brick pillars to be annual rent in the amount of \$2,435, with an annual Consumer Price Index adjustment; consideration for the rock slope protection and sheet pile to be the public health and safety, with the State reserving the right to fix a different rent periodically during the lease term as provided in the lease; and liability insurance in an amount no less than \$1,000,000 per occurrence.

**EXHIBIT A**

**LEASE 3579**

**LAND DESCRIPTION**

A parcel of submerged land situated in Huntington Harbour, in the City of Huntington Beach, Orange County, California, described as follows:

BEGINNING at the most westerly corner of Lot 136, as said lot is shown and so designated on that certain map of Tract No. 5481 filed in Book 215, Pages 11 through 22, Official Records of said County; thence along the westerly extension of the northerly line of said lot 60.00 feet, more or less, to the pierhead line as said pierhead line is described in Resolution No. 5631, passed and adopted January 21, 1986 by the City Council of said City; thence southerly 50.00 feet along said pierhead line to the westerly extension of the southerly line of said lot; thence along said extension 60.00 feet, more or less, to the most southerly corner of said lot; thence northerly along the westerly line of said lot to the POINT OF BEGINNING.

**END OF DESCRIPTION**

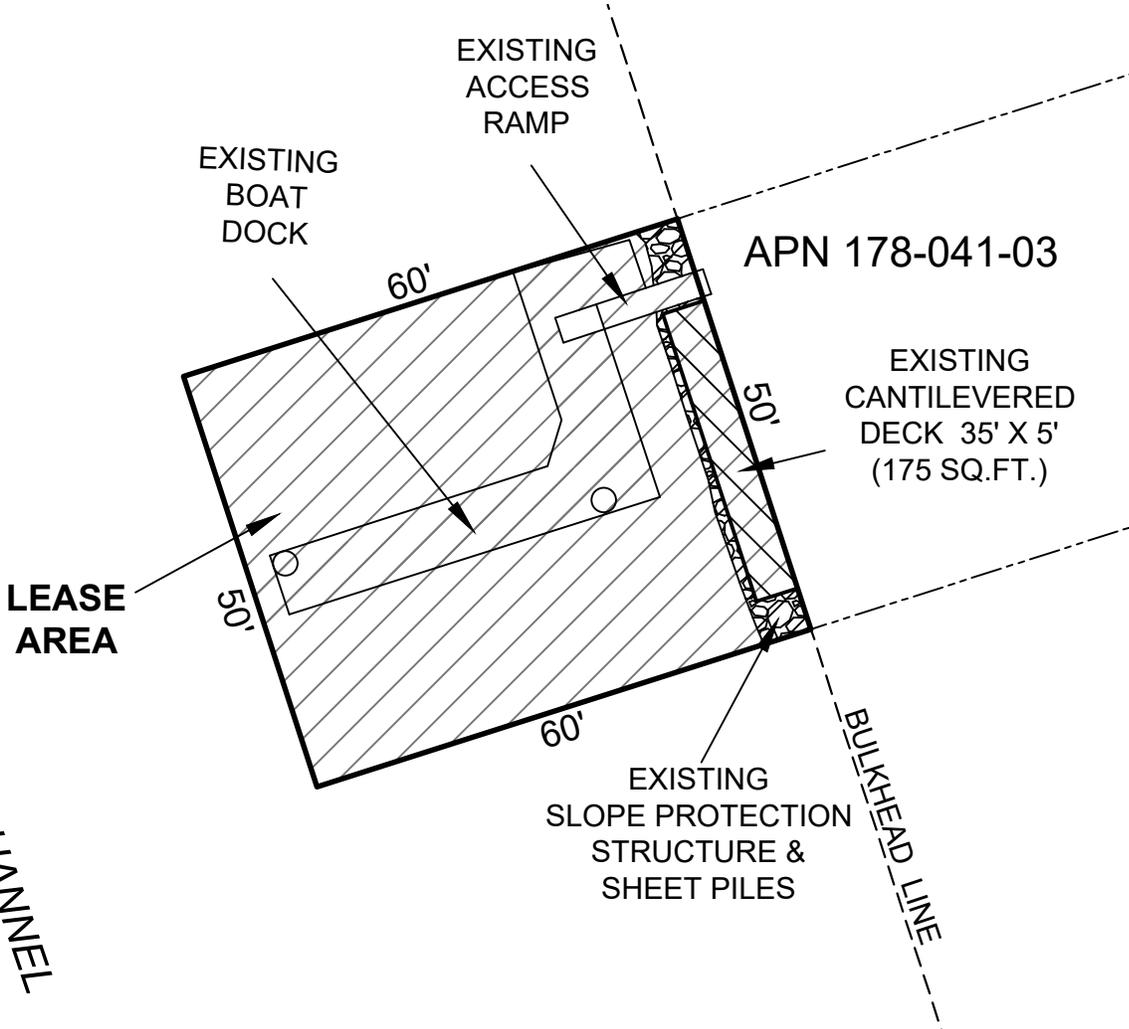

Prepared 01/21/2022 by the California State Lands Commission Boundary Unit.
