

Staff Report 23

APPLICANT:

H. Dennis Katsuki and Linda M. Katsuki as trustees of the Linda M. Katsuki and H. Dennis Katsuki Revocable Trust dated June 18, 2020

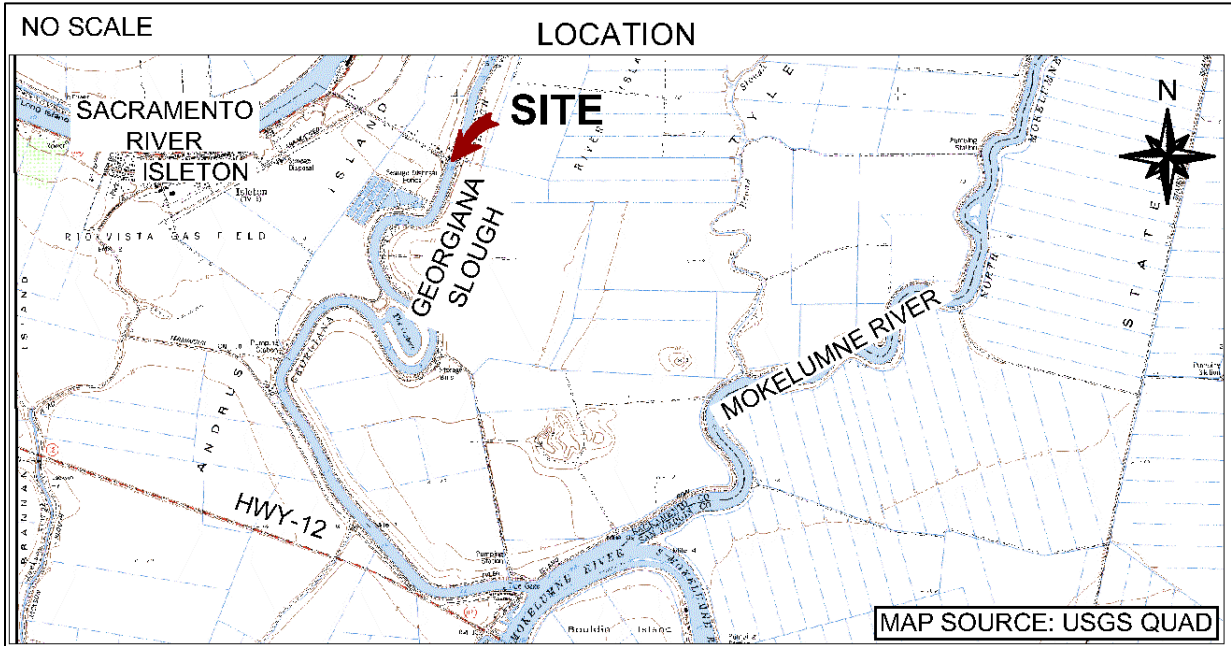

PROPOSED ACTION:

Issuance of a General Lease – Recreational Use.

AREA, LAND TYPE, AND LOCATION:

Sovereign land in Georgiana Slough, adjacent to 605 West Tyler Island Bridge Road, near Isleton, Sacramento County (as shown in Figure 1).

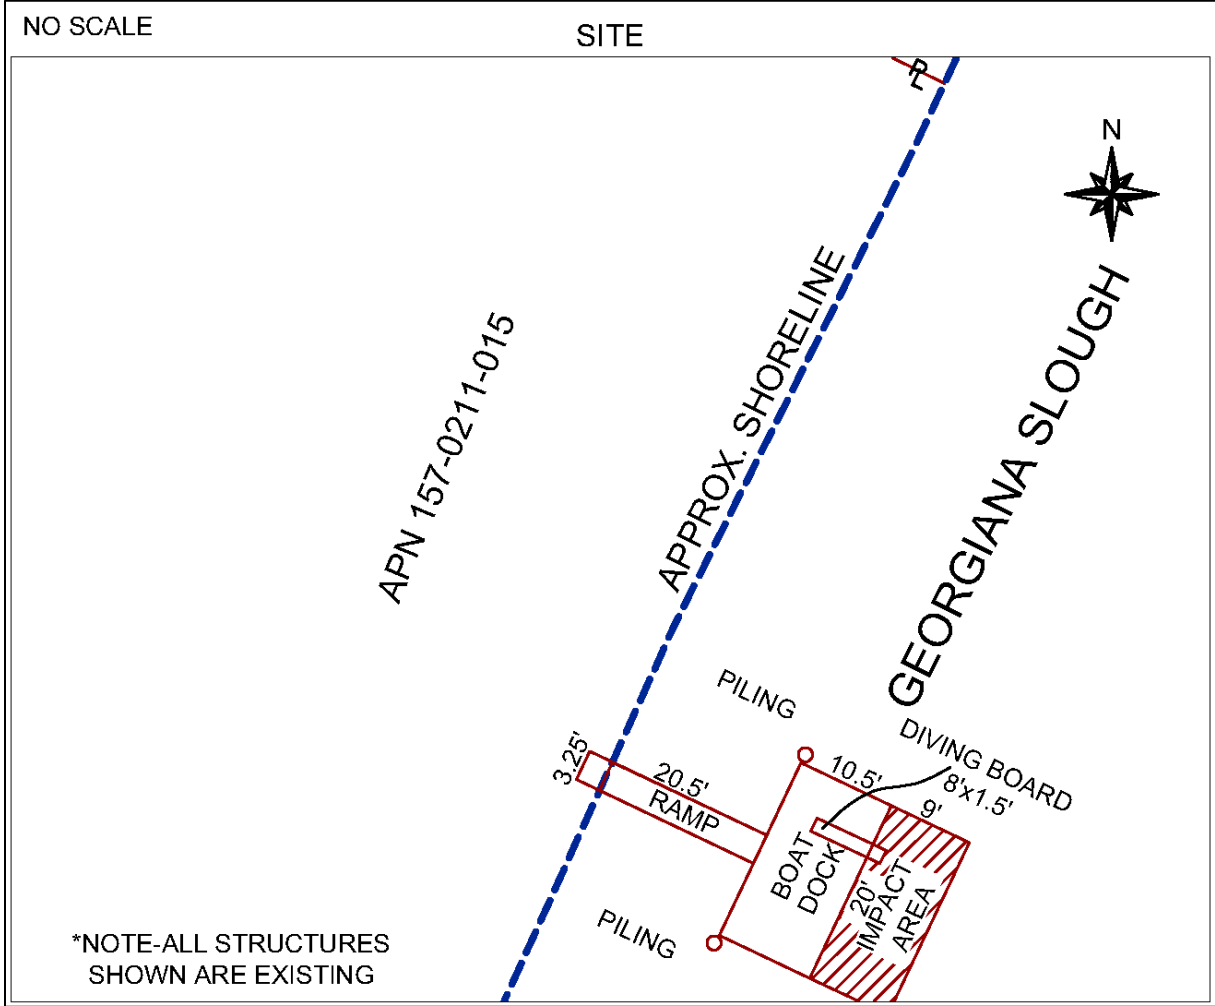

Figure 1. Location

AUTHORIZED USE:

Use of an existing boat dock, diving board, walkway, and two pilings (as shown in Figure 2).

Figure 2. Site Map

NOTE: This depiction of the lease premises is based on unverified information provided by the applicant or other parties and is not a waiver or limitation of any State interest in the subject or any other property.

TERM:

10 years, beginning October 19, 2023.

CONSIDERATION:

\$140 per year, with annual Consumer Price Index adjustment and compensation in the amount of \$345 for the unauthorized use of State land from the period April 23, 2021 through October 18, 2023.

SPECIFIC LEASE PROVISIONS:

- Liability insurance in an amount no less than \$1,000,000 per occurrence.
- Lessee agrees and acknowledges that hazards associated with sea level rise may require additional maintenance or protection strategies regarding the improvements on the Lease Premises.
- Lessee agrees the provisions of Section 3, Paragraph 8 shall also be extended to the period of Lessee's unauthorized occupation of State-owned lands from April 23, 2021 through October 18, 2023.

STAFF ANALYSIS AND RECOMMENDATION:

AUTHORITY:

Public Resources Code sections 6005, 6216, 6301, 6501.1, 6503, 6503.5 and 6505.5; California Code of Regulations, title 2, sections 2000 and 2003.

PUBLIC TRUST AND STATE'S BEST INTERESTS:

On September 1, 2011, the Commission authorized the issuance of a Recreational Pier Lease to Dennis H. Katsuki and Linda M. Katsuki, for the use of an existing boat dock, walkway, and two pilings ([Item 20, September 1, 2011](#)). The lease expired on April 22, 2021.

On July 1, 2020, ownership interest in the upland property was transferred from Dennis H. Katsuki and Linda M. Katsuki to H. Dennis Katsuki and Linda M. Katsuki as trustees of the Linda M. Katsuki and H. Dennis Katsuki Revocable Trust dated June 18, 2020.

The Applicant is now applying for a General Lease – Recreational Use, for the use of the existing boat dock, diving board, walkway, and two pilings. Staff is requesting compensation in the amount of \$345 for the unauthorized use of State land from the period April 23, 2021 (the day after the previous lease expired) through October 18, 2023 (the day before the issuance of the proposed lease). Additionally, the proposed lease will require the applicant to indemnify the State for the entire period of unauthorized occupation, from April 23, 2021 through October 18, 2023.

While processing the application, boundary staff noted the presence of a diving board attached to the boat dock. The diving board facilitates recreational activities such as swimming.

The subject facilities are privately owned and maintained by the Applicant. The boat dock, walkway, and two pilings are used for recreational boating. Recreational boating is a water dependent use that is generally consistent with the common law Public Trust Doctrine. The California Legislature has identified private recreational boating facilities as an authorized use of Public Trust land (Pub. Resources Code, § 6503.5.).

The subject facilities are located directly waterward of the upland property and occupy a relatively small area of the slough. The proposed lease will not interfere with navigation and does not substantially interfere with any Public Trust needs at this time or the foreseeable future.

The proposed lease does not alienate the State's fee simple interest or permanently impair public rights. The lease is limited to a 10-year term, does not grant the lessee exclusive rights to the lease premises, and reserves an easement to the public for Public Trust-consistent uses. Upon termination of the lease, the lessee may be required to remove all improvements from State land and restore the lease premises to their original condition.

The proposed lease requires the lessee to insure the lease premises and indemnify the State for any liability incurred as a result of the lessee's activities thereon. The lease also requires the payment of annual rent to compensate the people of the State for the occupation of the public land involved.

CLIMATE CHANGE:

Climate change impacts, including sea level rise, more frequent and intense storm events, and increased flooding and erosion, affect both open coastal areas and inland waterways in California. The facilities are located on Georgiana Slough, in a tidally influenced site vulnerable to flooding at current sea levels and at a higher risk of flood exposure given projected scenarios of sea level rise.

The California Ocean Protection Council updated the *State of California Sea-Level Rise Guidance* in 2018 to provide a synthesis of the best available science on sea level rise projections and rates. Commission staff evaluated the "high emissions," "medium-high risk aversion" scenario to apply a conservative approach based on both current emission trajectories and the lease location and structures. The San Francisco tide gauge was used for the projected sea level rise scenario for the region as listed in Table 1.

Table 1. Projected Sea Level Rise for San Francisco

Year	Projection (feet)
2030	0.8
2040	1.3
2050	1.9
2100	6.9

Source: Table 13, [State of California Sea-Level Rise Guidance: 2018 Update](#)

Note: Projections are with respect to a 1991 to 2009 baseline.

This effect could increase the slough's inundation levels within the lease area. In addition, as stated in [Safeguarding California Plan: 2018 Update](#) (California Natural Resources Agency 2018), climate change is projected to increase the frequency and severity of natural disasters related to flooding, fire, drought, extreme heat, and storms (especially when coupled with sea level rise). In rivers and tidally influenced waterways, more frequent and powerful storms can result in increased flooding conditions and damage from storm-created debris as well as decreased bank stability and structure. Conversely, climate change induced droughts could decrease river levels and flow for extended periods of time. Climate change and sea level rise will further influence riverine areas by changing erosion and sedimentation rates. Flooding and storm flow, as well as runoff, will likely increase scour and decrease bank stability at a faster rate.

The floating dock and ramp are adaptable to higher water levels allowing them to rise and fall with storms and droughts and increasing their resiliency to some climate change impacts, but they may require more frequent maintenance or replacement to ensure continued function during and after storm seasons and to avoid dislodgement of the facilities. However, the pilings are fixed and therefore more vulnerable to sea level rise and more frequent flood events. These structures may need additional fortification or repair and maintenance to ensure they do not become dislodged or degraded, as they could pose risks to public safety and navigation.

Regular maintenance, as referenced in the lease, may reduce the likelihood of severe structural degradation or dislodgement. Pursuant to the proposed lease, the Applicant acknowledges that the lease premises and adjacent upland (not within the lease area) are located in an area that may be subject to the effects of climate change, including sea level rise.

CONCLUSION:

For all the reasons above, staff believes the issuance of this lease will not substantially interfere with Public Trust needs at this location, at this time, and for the term of the proposed lease; is consistent with the common law Public Trust Doctrine; and is in the best interests of the State.

OTHER PERTINENT INFORMATION:

1. Approval or denial of the application is a discretionary action by the Commission. Each time the Commission approves or rejects a use of sovereign land, it exercises legislatively delegated authority and responsibility as trustee of the State's Public Trust lands as authorized by law. If the Commission denies the application, the Applicant may be required to remove the boat dock and appurtenant facilities and return the premises to their original condition. The lessee has no right to a new lease or to renewal of any previous lease.
2. This action is consistent with the "Leading Climate Activism" and "Meeting Evolving Public Trust Needs" Strategic Focus Areas of the Commission's 2021-2025 Strategic Plan.
3. Staff recommends that the Commission find that this activity is exempt from the requirements of the California Environmental Quality Act (CEQA) as a categorically exempt project. The project is exempt under Class 1, Existing Facilities; California Code of Regulations, title 2, section 2905, subdivision (a)(2).

Authority: Public Resources Code section 21084 and California Code of Regulations, title 14, section 15300 and California Code of Regulations, title 2, section 2905.

RECOMMENDED ACTION:

It is recommended that the Commission:

CEQA FINDING:

Find that the activity is exempt from the requirements of CEQA pursuant to California Code of Regulations, title 14, section 15061 as a categorically exempt project, Class 1, Existing Facilities; California Code of Regulations, title 2, section 2905, subdivision (a)(2).

PUBLIC TRUST AND STATE'S BEST INTERESTS:

Find that the proposed lease will not substantially impair the public rights to navigation and fishing or substantially interfere with Public Trust needs and values at this location, at this time, and for the term of the lease; is consistent with the common law Public Trust Doctrine; and is in the best interests of the State.

AUTHORIZATION:

1. Authorize acceptance of compensation from the Applicant in the amount of \$345 for the unauthorized occupation of State land for the period beginning April 23, 2021 through October 18, 2023.
2. Authorize issuance of a General Lease – Recreational Use to the Applicant beginning October 19, 2023, for a term of 10 years, for the use of an existing boat dock, diving board, walkway, and two pilings; annual rent in the amount of \$140, with an annual Consumer Price Index adjustment; and liability insurance in an amount no less than \$1,000,000 per occurrence.
