

Staff Report 44

APPLICANT:

David A. Robinson and Susan J. Robinson, Trustees of the David and Susan Robinson Family Trust

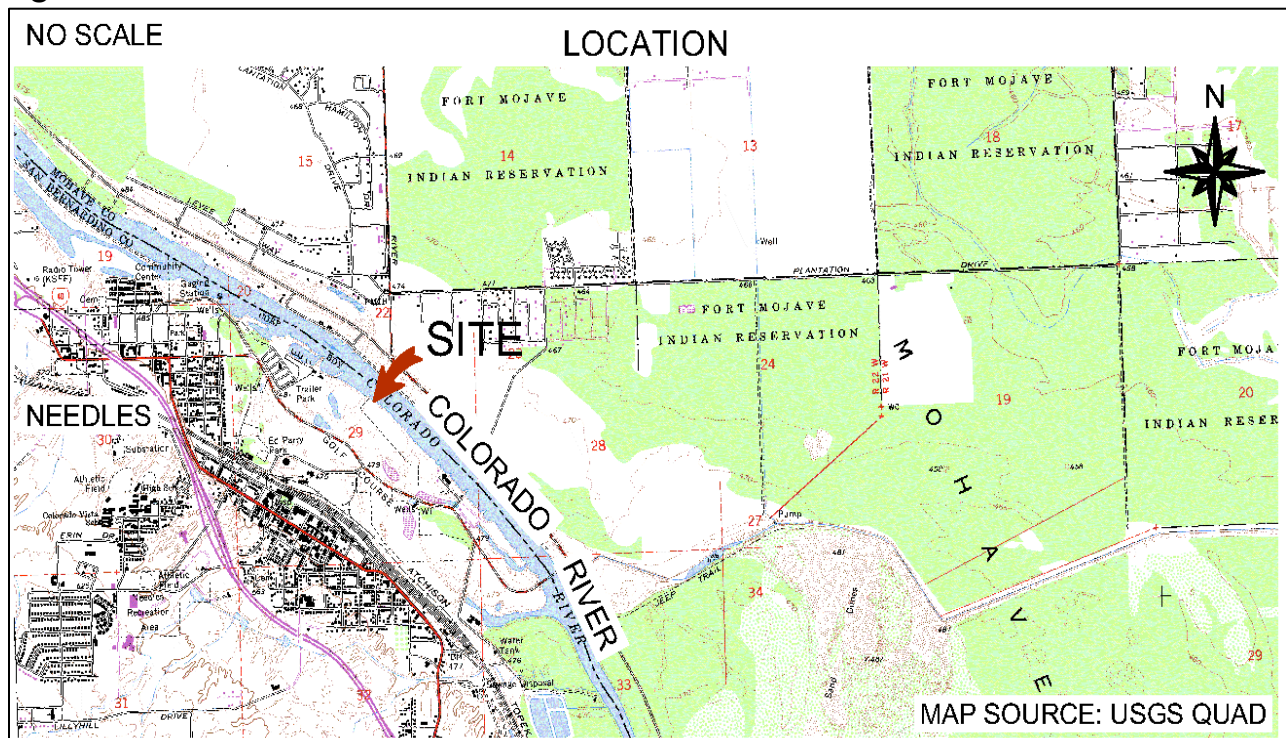

PROPOSED ACTION:

Issuance of a General Lease – Protective Structure Use.

AREA, LAND TYPE, AND LOCATION:

Sovereign land located in the Colorado River, adjacent to 1210 Beach Drive, Needles, San Bernardino County (as shown in Figure 1).

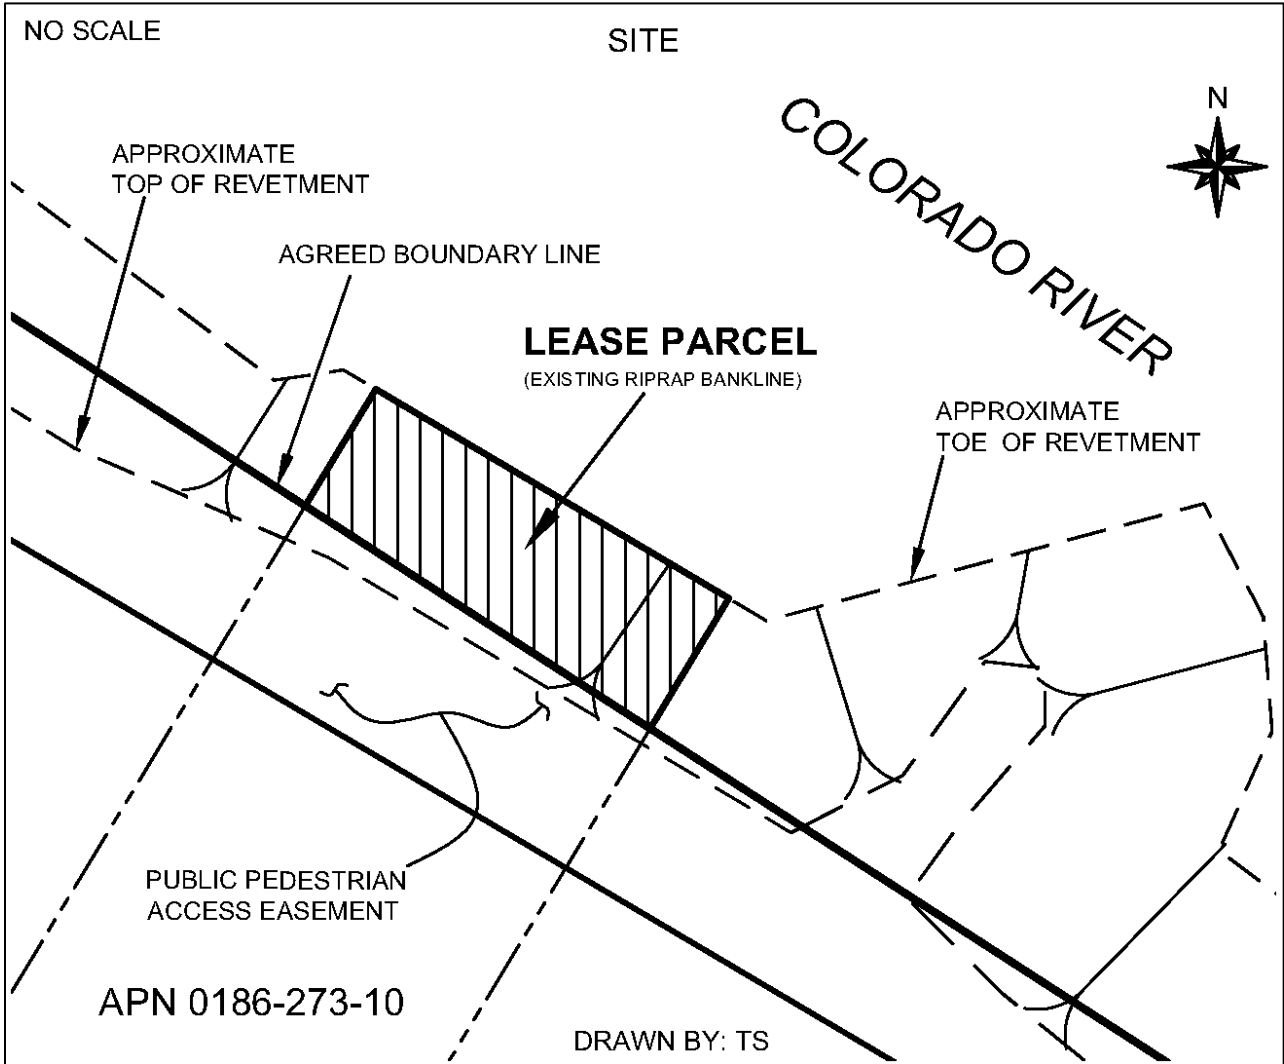

Figure 1. Location

AUTHORIZED USE:

Use of an existing riprap bankline (as shown in Figure 2).

Figure 2. Site Map

NOTE: This depiction of the lease premises is based on unverified information provided by the applicant or other parties and is not a waiver or limitation of any State interest in the subject or any other property.

TERM:

10 years, beginning February 21, 2024.

CONSIDERATION:

\$140 per year, with an annual Consumer Price Index adjustment.

SPECIFIC LEASE PROVISIONS:

- Liability insurance in an amount no less than \$1,000,000 per occurrence.
- Lessee agrees that the Public Pedestrian Access Easement located on portions of Lessee's fee owned upland property shall remain open to the public and that no structures or improvements shall be erected, nor any personal property placed, that would obstruct or prevent public access in and along the Easement.
- Lessee shall not place signs or advocate in any other manner to prevent or discourage public use of the Public Pedestrian Access Easement.
- Lessee assumes responsibility for the maintenance of the riprap bankline within the Lease Premises.
- Lessee agrees and acknowledges that the hazards associated with climate change may require additional maintenance or protection strategies regarding the improvements on the lease premises.

BACKGROUND:

On December 12, 1990 ([Item 8, December 12, 1990](#)), the Commission authorized a Boundary Line Agreement and Compromise Settlement (AD 134) which confirmed the State's fee ownership of sovereign land located in the Colorado River at this location. Pursuant to Public Resources Code section 6501.1, projects in this location, including new development or maintenance of existing facilities, extending waterward of the ordinary high-water mark (OHWM), as fixed by AD 134, require a lease from the Commission. The Applicant's upland property is located along the Colorado River adjacent to the fixed OHWM.

Pursuant to AD 134, the State of California was granted a Public Pedestrian Access Easement (Easement) running parallel to the fixed OHWM. The Easement is intended to provide public access to and along the bank of the Colorado River. The Easement affects lots 1 through 40 of the Rio Buena Vista residential subdivision, one of which is the Applicant's property. The Easement provides access to the Colorado River and can be accessed by the public from the northern or southern end of the subdivision, or from the Colorado River.

The U.S. Department of the Interior, Bureau of Reclamation (Reclamation) conducted a review by boat of the riprap bankline on March 27, 2002, and conducted a site visit on April 10, 2002. These inspections revealed that the bankline was cleared of vegetation and that the federally constructed riprap and jetties were undisturbed and in good condition.

By letter dated April 23, 2002, Reclamation declared that it would not place additional riprap on the bankline because of interference from the upland residential development. Reclamation stated that the upland homeowners would be responsible for maintaining protection of their own bankline in the future, subject to the homeowner's seeking approval and permitting of their riprap or bankline construction work from the U.S. Army Corps of Engineers.

STAFF ANALYSIS AND RECOMMENDATION:

AUTHORITY:

Public Resources Code sections 6005, 6216, 6301, 6321, 6321.2, 6501.1, and 6503; California Code of regulations, title 2, sections 2000 and 2003.

PUBLIC TRUST AND STATE'S BEST INTERESTS:

On February 21, 2014, the Commission authorized a General Lease – Protective Structure Use to David A. Robinson and Susan J. Robinson, Trustees of the David and Susan Robinson Family Trust, for the use of an existing riprap bankline in the Colorado River, adjacent to 1210 Beach Drive, Needles, San Bernardino County ([Item 46, February 21, 2014](#)). This lease expires February 20, 2024.

Now the Applicant is applying for a General Lease – Protective Structure Use for the use of the existing riprap bankline in the Colorado River, adjacent to 1210 Beach Drive, Needles, San Bernardino County. Staff recommends issuance of a General Lease – Protective Structure Use to the Applicant, to take effect on February 21, 2024.

The Applicant owns the uplands adjoining the lease premises and the existing riprap bankline is maintained by the Applicant and serves to stabilize the bank and support the integrity of both the river and the upland property. Loss or degradation of this structure could result in property damage and adverse impacts to Public Trust resources in the lease area and the surrounding waterway. As such, the riprap bankline provides a benefit to both the public and the upland owner and does not negatively impact the Public Trust uses in this location.

The proposed Lease does not alienate the State's fee simple interest or permanently impair public rights. The lease is limited to a 10-year term, does not grant the lessee exclusive rights to the lease premises, and reserves an easement to the public for Public Trust-consistent uses. Upon termination of the lease, the lessee may be required to remove all improvements from State land and restore the lease premises to their original condition.

The proposed lease requires the lessee to insure the lease premises and indemnify the State for any liability incurred as a result of the lessee's activities thereon. The lease also requires the payment of annual rent to compensate the people of the State for the occupation of the public land involved.

CLIMATE CHANGE:

The lease area in the Colorado River is not tidally influenced and, therefore, would not be subject to sea level rise. The water level near the existing improvement is regulated primarily by water released upstream from the Davis Dam. As stated in [Safeguarding California Plan: 2018 Update](#) (California Natural Resources Agency 2018), climate change is projected to increase the frequency and severity of natural disasters related to flooding, fire, extreme heat, drought, and storms. Droughts could dramatically reduce river flow and water levels, leading to loss of public access and navigability. Climate change will further influence riverine areas by changing erosion and sedimentation rates; likewise, runoff from more frequent and severe storm events will likely increase scour and lead to a more rapid decrease in bank stability.

The combination of these projected conditions could increase the likelihood of damage to structures within the lease premises from floods or droughts during the term of the lease. The existing riprap bankline protection is a fixed feature and will not be able to shift in response to changing water levels, and therefore may need relocation or reinforcement in the future to withstand higher levels of flood exposure.

Regular maintenance, as referenced in the lease, may reduce the likelihood of severe structural degradation or dislodgement. Pursuant to the proposed lease, the Applicant acknowledges that the lease premises and adjacent upland are in an area that may be subject to the effects of climate change.

CONCLUSION:

For all the reasons above, staff believe approval of this lease will not substantially interfere with Public Trust needs at this location, at this time, nor for the term of the proposed lease; and is in the best interests of the State.

OTHER PERTINENT INFORMATION:

1. Approval or denial of the application is a discretionary action by the Commission. Each time the Commission approves or rejects a use of sovereign land, it exercises legislatively delegated authority and responsibility as trustee of the State's Public Trust lands as authorized by law. If the Commission denies the

application, the Applicant may be required to remove the riprap bankline and restore the lease premises to their original condition. The lessee has no right to a new lease or to renewal of any previous lease.

2. This action is consistent with the “Leading Climate Activism” and “Meeting Evolving Public Trust Needs” Strategic Focus Areas of the Commission’s 2021-2025 Strategic Plan.
3. Staff recommends that the Commission find that this activity is exempt from the requirements of the California Environmental Quality Act (CEQA) as a categorically exempt project. The project is exempt under Class 1, Existing Facilities; California Code of Regulations, title 2, section 2905, subdivision (a)(2).

Authority: Public Resources Code section 21084, California Code of Regulations, title 14, section 15300, and California Code of Regulations, title 2, section 2905.

RECOMMENDED ACTION:

It is recommended that the Commission:

CEQA FINDING:

Find that the activity is exempt from the requirements of CEQA pursuant to California Code of Regulations, title 14, section 15061 as a categorically exempt project, Class 1, Existing Facilities; California Code of Regulations, title 2, section 2905, subdivision (a)(2).

PUBLIC TRUST AND STATE’S BEST INTERESTS:

Find that the proposed lease will not substantially impair the public rights to navigation and fishing or substantially interfere with Public Trust needs and values at this location, at this time, and for the term of the lease; is not inconsistent with the common law Public Trust Doctrine; and is in the best interests of the State.

AUTHORIZATION:

Authorize issuance of a General Lease – Protective Structure Use to the Applicant beginning February 21, 2024, for a term of 10 years, for the use of an existing riprap bankline; annual rent in the amount of \$140, with an annual Consumer Price Index adjustment; and liability insurance in an amount no less than \$1,000,000 per occurrence.
