

Staff Report 14

APPLICANT:

Nancy E. Proano, as Trustee of The Proano Family Trust of 5/2/96, as Amended and Restated on 10/14/11; Scott A. Jamar, as Trustee of the Scott A. Jamar 2022 Separate Property Trust dated 12/13/2022; and Kathleen Diane Ayre

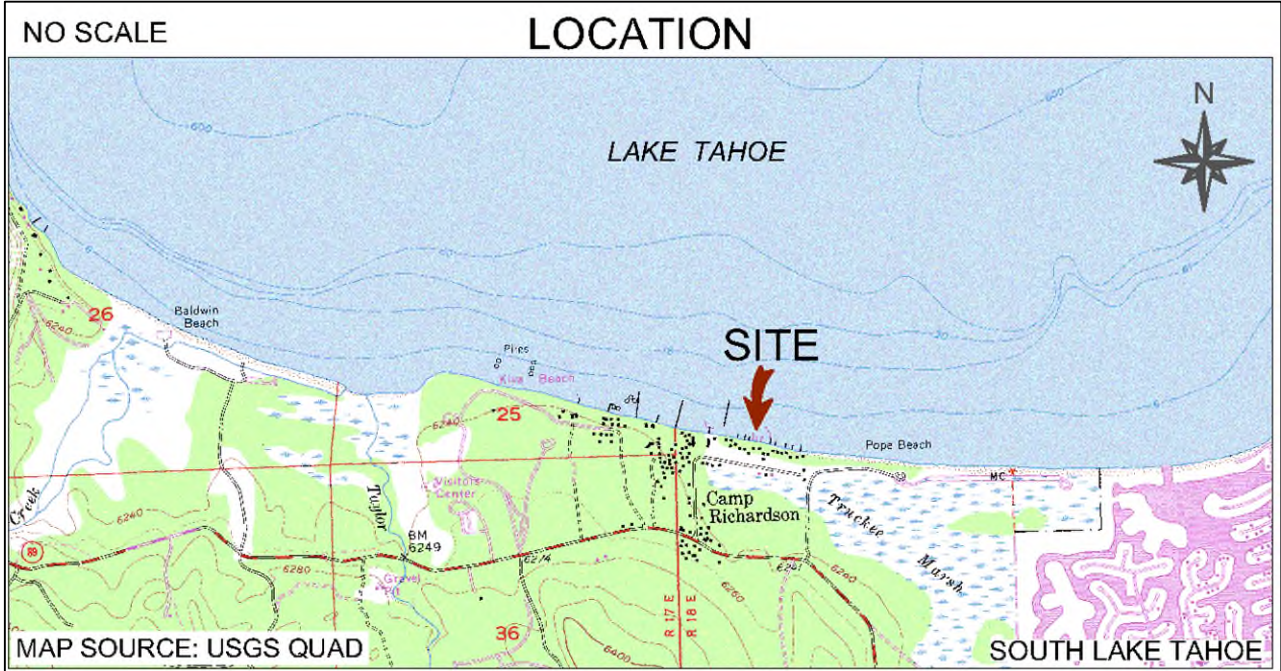

PROPOSED ACTION:

Issuance of a General Lease – Recreational Use.

AREA, LAND TYPE, AND LOCATION:

Sovereign land in Lake Tahoe, adjacent to 3061 Jameson Beach Road, South Lake Tahoe, El Dorado County (as shown in Figure 1).

Figure 1. Location

AUTHORIZED USE:

Use of an existing pier and one mooring buoy (as shown in Figure 2).

Figure 2. Site Map

NOTE: This depiction of the lease premises is based on unverified information provided by the Applicant or other parties and is not a waiver or limitation of any State interest in the subject or any other property.

TERM:

10 years, beginning May 1, 2024.

CONSIDERATION:

\$883 per year, with an annual Consumer Price Index adjustment.

SPECIFIC LEASE PROVISIONS:

- Liability insurance in an amount no less than \$1,000,000 per occurrence.
- Lessee acknowledges that a permit or registration from the Tahoe Regional Planning Agency (TRPA) may be required for the Authorized Improvements and failure to obtain a permit or registration from TRPA and maintain compliance with that permit or registration may result in TRPA imposing civil penalties and will constitute a breach of the lease.
- The lease provides that signs shall be posted on each side of the pier to indicate passage and to provide continuous shoreline access to the Public Trust Easement below elevation 6228.75 feet, Lake Tahoe Datum (LTD).
- Lessee shall not store any personal items or construct any improvements in the Public Trust easement which may impair the public's right of access for navigation, fishing, and Public Trust-consistent recreational uses.
- Lessee agrees to the provisions of Section 3, Paragraph 11 shall also extend to the period of Lessee's unauthorized occupation of state-owned lands from December 17, 2021, through August 14, 2024.

STAFF ANALYSIS AND RECOMMENDATION:

AUTHORITY:

Public Resources Code sections 6005, 6216, 6301, 6501.1, 6503, 6503.5, and 6505.5; California Code of regulations, title 2, sections 2000 and 2003.

PUBLIC TRUST AND STATE'S BEST INTERESTS:

On June 19, 2014, the Commission authorized a General Lease – Recreational Use to Gail R. Jamar, Trustee of the Gail R. Jamar 2001 Separate Property Trust dated 7/11/01, and Nancy E. Proano and Robert J. Proano, Trustees of the Proano Family Trust, under declaration of trust dated May 2, 1996 ([Item 35, June 19, 2014](#)). That lease expired on April 30, 2024. Robert J. Proano recently passed away, leaving Nancy E. Proano as the sole remaining trustee of The Proano Family Trust of 5/2/96, as Amended and Restated on 10/14/11.

On December 17, 2021, ownership interest in the upland parcel was transferred to Scott Allen Jamar and Kathleen Diane Ayre, following the passing of Gail R. Jamar. On March 17, 2023, Scott Allen Jamar transferred ownership interest to Scott A.

Jamar, Trustee of the Scott A. Jamar 2022 Separate Property Trust dated 12/13/2022.

Because the deed transfers occurred because of one co-lessee's passing property on, and this transfer was within the same family, the Lessee did not notify the Commission of these changes nor seek an assignment of the lease. Instead, the Lessee's family and the co-lessees continued to pay rent and fulfill the obligations of the lease. For consistency and ease of record-keeping and accounting, staff recommends retaining the original lease anniversary date and starting the new lease on May 1, 2024. The new lease will backdate the indemnity provisions to the date of the upland property transfer to ensure the state is protected.

The Applicant is applying for an issuance of a General Lease – Recreational Use for the use of an existing pier and one mooring buoy. The mooring buoy was registered with TRPA on August 26, 2023 (Registration No. 10954).

The lease will require the Applicant to indemnify the State for the unauthorized occupation of State land for the subject facilities for the period from April 30, 2024, to August 14, 2024, ensuring the State is protected.

The topography at this location is gently sloped and consists of a sandy beach, making the shoreline easily accessible for pedestrians in this area. The pier is built on short pilings, and public access for pedestrians is not available at varying water levels underneath the pier within the Public Trust Easement. Applicant thus agrees to allow the public to pass and re-pass over the pier by stepping up and over the pier from the sandy beach in the Public Trust easement. Signs are required to be posted on each side of the pier identifying the designated public passageway and are required to be in place at all times.

The Applicant owns the uplands adjoining the lease premises. The subject improvements are privately owned and maintained and facilitate recreational boating. Recreational boating is a water-dependent use that is generally consistent with the common law Public Trust Doctrine. The California Legislature has identified private recreational boating facilities as an authorized use of Public Trust land. (Pub. Resources Code, § 6503.5.)

The proposed lease does not alienate the State's fee simple interest or permanently impair public rights. The lease is limited to a 10-year term, does not grant the lessee exclusive rights to the lease premises, and reserves an easement to the public for Public Trust-consistent uses. Upon termination of the lease, the lessee may be

required to remove all improvements from State land and restore the lease premises to their original condition.

The proposed lease requires the lessee to insure the lease premises and indemnify the State for any liability incurred as a result of the lessee's activities thereon. The lease also requires the payment of annual rent to compensate the people of the State for the occupation of the public land involved.

CLIMATE CHANGE:

Climate change significantly affects inland non-tidal lakes such as Lake Tahoe. The frequency and severity of natural disasters like flooding, wildfire, drought, extreme heat, and storms are increasing throughout the state of California, including the Sierra Nevada mountains, and will continue to accelerate through the end of the century. Structures along the shores of inland lakes are particularly vulnerable to the more frequent and extreme weather events and shifts in seasonal characteristics.

According to [California's Fourth Climate Change Assessment](#), released in 2018, the most significant impacts of climate change in the Sierra Nevada Region are more intense heat, precipitation extremes, declining snowpacks, and changes in streamflow timing. The long-term warming trend will lead to warmer and shorter winters, and longer and drier summers. Successive dry and warm winters are resulting in minimal snowpack, increased winter streamflows and floods, and decreased spring and summer runoff. Prolonged low lake levels will become normal. Low lake level conditions can create more expansive beaches and increased shoreline access in dry months. However, these conditions interfere with boat launching and mooring facilities. This impact is most noticeable where the facilities are sited on shallow, low gradient lake bottom locations.

Dry winters will be punctuated with exceedingly wet years where prolonged and excessive precipitation can produce flash floods. High precipitation in these years will result in higher lake levels, causing beaches to narrow and reducing public access. Extra saturation of the soil can increase erosion, especially following intense wildfire seasons. Surface runoff water may carry more sediment into the lake, adversely impacting water quality and clarity.

Climate change may also lead to more intense and unpredictable storm events and winds. These storms may deviate from prevailing wind patterns for the region. These winds can accelerate shoreline erosion in some areas or cause erosion in

areas not typically subject to erosion. Additionally, these winds can increase wave damage on structures and boats along the lake.

Improvements authorized under this lease may require more frequent inspection and maintenance to ensure they are not displaced during storm events. Watercraft moored to buoys, piers, or docks are also vulnerable to high wind events and damaging waves.

CONCLUSION:

For all the reasons above, staff believes the issuance of this lease will not substantially interfere with Public Trust needs at this location, at this time, and for the term of the proposed lease; is consistent with the common law Public Trust Doctrine; and is in the best interests of the State.

OTHER PERTINENT INFORMATION:

1. Approval or denial of the application is a discretionary action by the Commission. Each time the Commission approves or rejects a use of sovereign land, it exercises legislatively delegated authority and responsibility as trustee of the State's Public Trust lands as authorized by law. If the Commission denies the lease, the Applicant may be required to remove the existing improvements. The lessee has no right to a new lease or to renewal of any previous lease.
2. This action is consistent with the "Leading Climate Activism" and "Meeting Evolving Public Trust Needs" Strategic Focus Areas of the Commission's 2021-2025 Strategic Plan.
3. Staff recommends that the Commission find that this activity is exempt from the requirements of the California Environmental Quality Act (CEQA) as a categorically exempt project. The project is exempt under Class 1, Existing Facilities; California Code of Regulations, title 14, section 15301.

Authority: Public Resources Code section 21084 and California Code of Regulations, title 14, section 15061.

RECOMMENDED ACTION:

It is recommended that the Commission:

CEQA FINDING:

Find that the activity is exempt from the requirements of CEQA pursuant to California Code of Regulations, title 14, section 15061 as a categorically exempt project, Class 1, Existing Facilities; California Code of Regulations, title 14, section 15301.

PUBLIC TRUST AND STATE'S BEST INTERESTS:

Find that the proposed lease will not substantially impair the public rights to navigation and fishing or substantially interfere with Public Trust needs and values at this location, at this time, and for the term of the lease; is consistent with the common law Public Trust Doctrine; and is in the best interests of the State.

AUTHORIZATION:

Authorize issuance of a General Lease – Recreational Use to the Applicant beginning May 1, 2024, for a term of 10 years, for use of an existing pier and one mooring buoy; annual rent in the amount of \$883, with an annual Consumer Price Index adjustment; and liability insurance in an amount no less than \$1,000,000 per occurrence.
