

Staff Report 42

APPLICANT:

Nicholas M. Hanna and Andrea L. Hanna; and Russel H. Butcher and Leonore Butcher

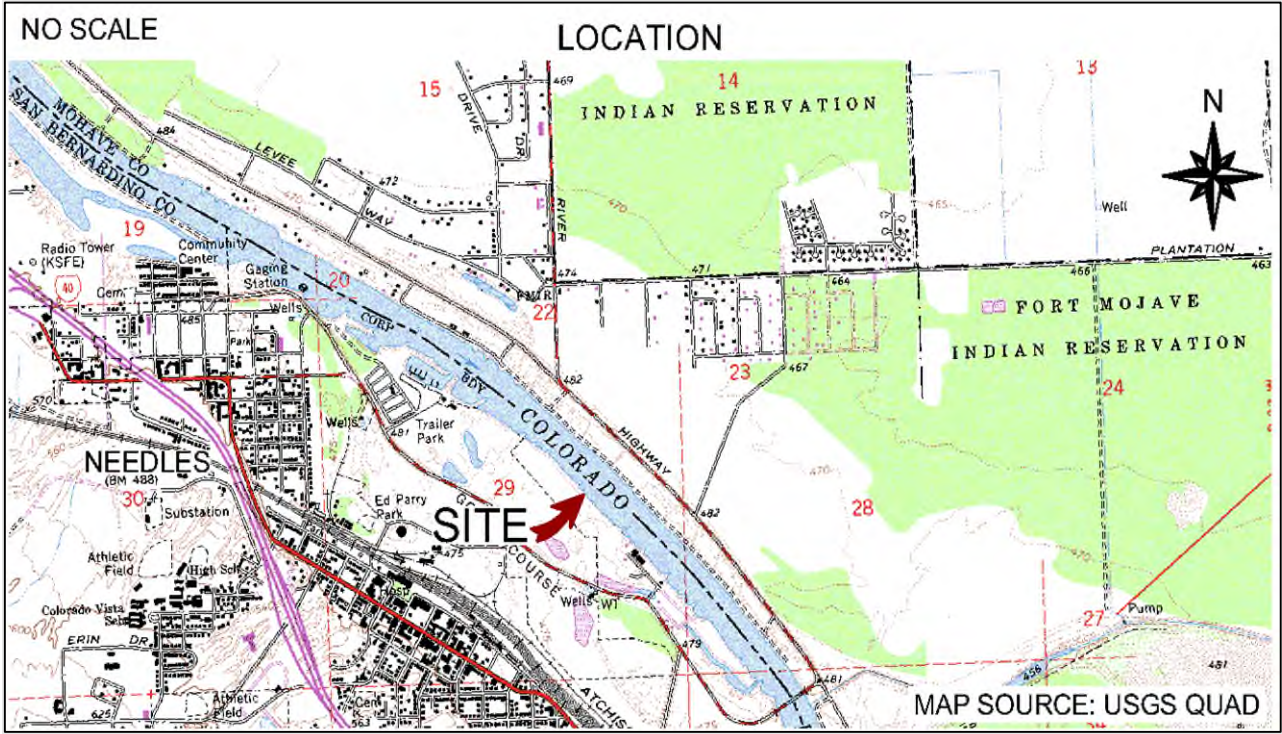

PROPOSED ACTION:

Issuance of a General Lease – Recreational and Protective Structure Use.

AREA, LAND TYPE, AND LOCATION:

Sovereign land located in the Colorado River, adjacent to 1122 Beach Drive, Needles, San Bernardino County (as shown in Figure 1).

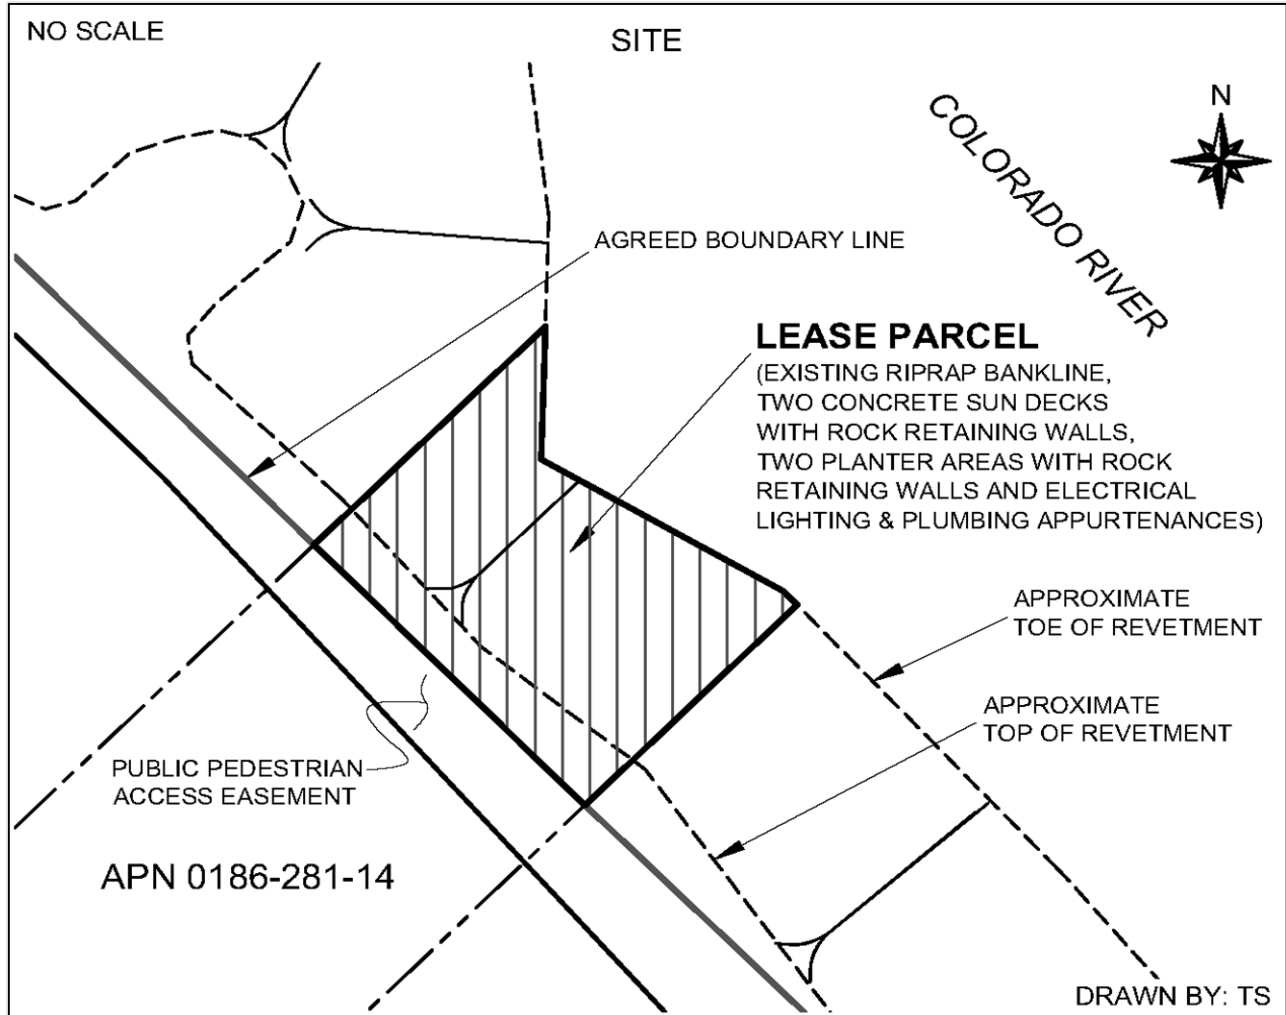

Figure 1. Location

AUTHORIZED USE:

Use of an existing concrete stairway, two concrete sundecks, two planter areas, rock retaining walls, electrical lighting and plumbing appurtenances, and riprap bankline (as shown in Figure 2).

Figure 2. Site Map

NOTE: This depiction of the lease premises is based on unverified information provided by the Applicant or other parties and is not a waiver or limitation of any State interest in the subject or any other property.

TERM:

10 years, beginning February 21, 2025.

CONSIDERATION:

\$825 per year, with an annual Consumer Price Index adjustment.

SPECIFIC LEASE PROVISIONS:

- Liability insurance in an amount no less than \$1,000,000 per occurrence.
- Lessee acknowledges that the Public Pedestrian Access Easement located on portions of Lessee's fee-owned upland property shall remain open to the public and that no structures or improvements shall be erected, nor any personal property placed, that would obstruct or prevent public access in and along the Easement.
- Lessee acknowledges that they shall not place signs or advocate in any other manner to prevent or discourage public use of the Public Pedestrian Access Easement or the stairway.
- Lessee assumes responsibility for the maintenance of the riprap bankline within the Lease Premises.
- Lessee and the public shall have equal rights to access the stairs on the lease premises and Lessee shall not exclude the public from use of the stairs, install any structures to prevent public use of the stairs, nor post signage or advocate in any manner against public use of the stairs.
- Lessee agrees to the provisions of Section 3, Paragraph 11 shall also extend to the period of Lessee's unauthorized occupation of state-owned lands prior to February 21, 2025.

BACKGROUND:

On December 12, 1990 ([Item 8, December 12, 1990](#)), the Commission authorized a Boundary Line Agreement and Compromise Settlement (AD 134) which confirmed the State's fee ownership of sovereign land located in the Colorado River at this location. Pursuant to Public Resources Code section 6501.1, projects in this location, including new development or maintenance of existing facilities, extending waterward of the ordinary high-water mark (OHWM), as fixed by AD 134, require a lease from the Commission. The Applicant's upland property is located along the Colorado River adjacent to the fixed OHWM.

Pursuant to AD 134, the State of California was granted a Public Pedestrian Access Easement (Easement) running parallel to the fixed OHWM. The Easement is intended to provide public access to and along the bank of the Colorado River. The Easement affects lots 1 through 40 of the Rio Buena Vista residential subdivision, one of which is the Applicant's property. The Easement provides access to the

Colorado River and can be accessed by the public from the northern or southern end of the subdivision, or from the Colorado River.

The U.S. Department of the Interior, Bureau of Reclamation (Reclamation) conducted a review by boat of the riprap bankline on March 27, 2002, and conducted a site visit on April 10, 2002. These inspections revealed that the bankline was cleared of vegetation and that the federally constructed riprap and jetties were undisturbed and in good condition.

By letter dated April 23, 2002, Reclamation declared that it would not place additional riprap on the bankline because of interference from the upland residential development. Reclamation stated that the upland homeowners would be responsible for maintaining protection of their own bankline in the future, subject to the homeowners seeking approval and permitting of their riprap or bankline construction work from the U.S. Army Corps of Engineers.

STAFF ANALYSIS AND RECOMMENDATION:

AUTHORITY:

Public Resources Code sections 6005, 6216, 6301, 6321, 6321.2, 6501.1, 6503, and 6505.5; California Code of Regulations, title 2, sections 2000 and 2003.

PUBLIC TRUST AND STATE'S BEST INTERESTS:

On February 21, 2014, the Commission authorized issuance of a General Lease – Recreational and Protective Structure use to Russel H. Butcher and Leonore Butcher and Nicholas M. Hanna and Andrea L. Hanna, for the use and maintenance of an existing concrete stairway, two concrete sundecks, two planter areas, rock retaining walls, electrical lighting and plumbing appurtenances, and riprap bankline, in the Colorado River adjacent to 1122 Beach Drive, Needles, San Bernardino County ([Item 43, February 21, 2014](#)). This lease expired on February 20, 2024.

The Applicant is now applying for a General Lease – Recreational and Protective Structure Use for use of an existing concrete stairway, two concrete sundecks, two planter areas, rock retaining walls, electrical lighting and plumbing appurtenances, and riprap bankline, in the Colorado River, adjacent to 1122 Beach Drive, Needles, San Bernardino County.

Rent has been paid through February 20, 2025, thus staff recommend that the new lease start date begin on February 21, 2025, to remain consistent with the previous lease. The lease provisions regarding indemnity will apply for the period of February 21, 2024, the day after the previous lease expired, through February 20, 2025, the day before the beginning of the proposed lease.

The Applicant owns the uplands adjoining the lease premises, and the subject facilities are located directly waterward of the upland property. The existing concrete stairway with rock walls on the lease premises serves to provide safe access to the river for both the Lessee and the public. As such, these improvements provide a benefit to the public and facilitate Public Trust uses in this location. To ensure that the stairway remains available for public use, the proposed lease includes provisions protecting the public's right to access these improvements.

The riprap bankline on the lease premises was originally constructed by the federal government but is now maintained by the Applicant. The riprap serves to stabilize the bank and support the integrity of both the river as a navigational channel and the upland property, including the public river access easement. Loss or degradation of this structure could result in property damage and adverse impacts to Public Trust resources in the lease area and the surrounding waterway. As such, this improvement provides a benefit to both the public and the upland owner and does not negatively impact Public Trust uses in this location.

The two planter areas and two concrete sundecks on the lease premises serve as an extension of the upland property and represents a private use of public land which is generally not consistent with the Public Trust. However, the Commission has issued leases on a limited basis for existing facilities that are not generally consistent with the Public Trust when such facilities do not significantly interfere with Public Trust needs and values. The existing planter areas, sundecks, and lighting and plumbing appurtenances on the lease premises meet this qualification, as they do not significantly interfere with Public Trust needs and values at this location, and public access to the river is preserved by the easement detailed above. Additionally, to further ensure that the uses and improvements authorized by the proposed lease do not impair public access, the lease includes provisions protecting access to Public Trust resources within the lease area, including a provision that the lessee cannot post signs prohibiting the public passage on the stairway, and other provisions to ensure non-interference with public access to and within the easement and the stairways that provide safe access to the river.

The proposed lease does not alienate the State's fee simple interest in the underlying land, nor will it permanently impair public rights. The lease is limited to a 10-year term, does not grant the lessee exclusive rights to the lease premises, and reserves an easement to the public for Public Trust-consistent uses. Upon termination of the lease, the lessee may be required to remove all improvements from State land and restore the lease premises to their original condition.

The proposed lease requires the lessee to insure the lease premises and indemnify the State for any liability incurred as a result of the lessee's activities thereon. The lease also requires the payment of annual rent to compensate the people of the State for the occupation of the public land involved.

CLIMATE CHANGE:

The lease area in the Colorado River is not tidally influenced and, therefore, would not be subject to sea level rise. The water level near the existing improvement is regulated primarily by water released upstream from the Davis Dam. As stated in [Safeguarding California Plan: 2018 Update](#) (California Natural Resources Agency 2018), climate change is projected to increase the frequency and severity of natural disasters related to flooding, fire, extreme heat, drought, and storms. Droughts could dramatically reduce river flow and water levels, leading to loss of public access and navigability. Climate change will further influence riverine areas by changing erosion and sedimentation rates; likewise, runoff from more frequent and severe storm events will likely increase scour and lead to a more rapid decrease in bank stability.

The combination of these projected conditions could increase the likelihood of damage to structures within the lease premises from floods or droughts during the term of the lease. All of the features are fixed and may need relocation as the concrete stairways, concrete sun decks, planter areas, associated rock retaining walls, and the riprap bankline will not be able to shift in response to changing water levels and may need relocation or reinforcement in the future to withstand higher levels of flood exposure or drought.

Regular maintenance, as referenced in the lease, may reduce the likelihood of severe structural degradation or dislodgement. Pursuant to the proposed lease, the Applicant acknowledges that the lease premises and adjacent upland are in an area that may be subject to the effects of climate change.

CONCLUSION:

For all the reasons above, staff believe approval of this lease will not substantially interfere with Public Trust needs at this location, at this time, nor for the term of the lease; and is in the best interests of the State.

OTHER PERTINENT INFORMATION:

1. Approval or denial of the application is a discretionary action by the Commission. Each time the Commission approves or rejects a use of sovereign land, it exercises legislatively delegated authority and responsibility as trustee of the State's Public Trust lands as authorized by law. If the Commission denies the application, the Applicant may be required to remove the improvements and restore the lease premises to their original condition. The lessee has no right to a new lease or to renewal of any previous lease.
2. This action is consistent with the "Leading Climate Activism" and "Meeting Evolving Public Trust Needs" Strategic Focus Areas of the Commission's 2021-2025 Strategic Plan.
3. Staff recommend that the Commission find that this activity is exempt from the requirements of the California Environmental Quality Act (CEQA) as a categorically exempt project. The project is exempt under Class 1, Existing Facilities; California Code of Regulations, title 2, section 2905, subdivision (a)(2).

Authority: Public Resources Code section 21084 and California Code of Regulations, title 14, section 15061 and California Code of Regulations, title 2, section 2905.

RECOMMENDED ACTION:

It is recommended that the Commission:

CEQA FINDING:

Find that the activity is exempt from the requirements of CEQA pursuant to California Code of Regulations, title 14, section 15061 as a categorically exempt project, Class 1, Existing Facilities; California Code of Regulations, title 2, section 2905, subdivision (a)(2).

PUBLIC TRUST AND STATE'S BEST INTERESTS:

1. Find that the existing and, for a limited period, continuing use of the existing concrete stairway will not substantially interfere with Public Trust needs and values at this location and is consistent with the common law Public Trust Doctrine.
2. Find the existing and, for a limited period, continuing use of the planter areas, sundecks, rock retaining walls, electrical lighting and plumbing appurtenances, and riprap bankline are generally not consistent with the Public Trust Doctrine, but the current use does not substantially interfere with the Public Trust.
3. Find that issuing the proposed lease is in the best interests of the State.

AUTHORIZATION:

Authorize issuance of a General Lease – Recreational and Protective Structure Use to the Applicant beginning February 21, 2025, for a term of 10 years, for the use of an existing concrete stairway, two concrete sundecks, two planter areas, electrical lighting and plumbing appurtenances, and riprap bankline; annual rent in the amount of \$825, with an annual Consumer Price Index adjustment; and liability insurance in amount no less than \$1,000,000 per occurrence.
